What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. **We have classified this product as class 6 out of 7, which is the highest risk class.** This rates the potential losses from future performance of the product at a very high level, and poor market conditions impact the capacity of the Company to pay you. The risk indicators assume you keep the product for 1-5 years. However, the level of risk would remain at 6 irrespective of how long this product is held. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time. Please be aware of the currency risk - the Fund is USD denominated.

Be aware of currency risk. The Fund is denominated in USD, therefore, you will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. In some circumstances you may be required to make further payments to pay for losses. The total loss you may incur may significantly exceed the amount invested.

This product does not include any protection from future market performance so you could lose some or all of your investment. If the Company is not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, The figures do not take into account your personal tax situation, which may also affect how much you get back. **What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.** The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product. Markets could develop very differently in the future.

Example Investment	EUR 10 000			
Years on investment	1	3	5	
Minimum	There is no minimum guaranteed return			
Stress	What you might get back after costs			
Stress Unfavorable	Average return each year	Euro 4,650	Euro 4,135	Euro 4,136
	What you might get back after costs	-50%	-20%	-10%
Unfavorable Moderate	Average return each year	Euro 8,380	Euro 9,350	Euro 10,292
	What you might get back after costs	-10%	5%	8%
Moderate Favorable	Average return each year	Euro 9,770	Euro 10,750	Euro 14,089
	What you might get back after costs	5%	10%	15%
Favorable	Average return each year	Euro 13,030	Euro 17,744	Euro 21,376

Unfavourable scenario: This type of scenario occurred for an investment between 1-5 years.
 Moderate scenario: This type of scenario occurred for an investment between 1-5 years.
 Favourable scenario: This type of scenario occurred for an investment between 1-5 years.

This table shows the money you could get back over the next one (1), three (3) and five (5) years, under different scenarios, assuming that you invest Euro10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of the other products. The scenarios presented are an estimate of future performance based on simulations from the past on how the value of this investment varies and are not an exact indicator for future performance.

The scenarios are based on share price total return after management fees and fund expenses.

What you get will vary depending on how the underlying investments perform, how the overall market performs and how long you keep the investments. The tax legislation of the retail investor's home Member State may have an impact on actual payout. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where the sub-fund is not able to pay you on its liquidation. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if FinYX (Cyprus) Investments Ltd is unable to pay out?

You are exposed to risk if Finyx (Cyprus) Investments Ltd is unable to pay you. No rewarding no guarantee systems are in place for the shareholders in case the AIFM is unable to pay out. The Fund has assets which are distinct and separate from those of the AIFM; moreover, for all the obligations entered into by the sub-fund, the latter shall respond with and to the extent of the assets of such sub-fund. No action not claim by creditors of the AIFM is admitted on the assets of the sub-fund. Any action or claim by creditors of each shareholder is admitted only on the shareholding held by the latter. The AIFM shall not use under any circumstance, in its own interest or in the interest of third parties, any assets or good belonging and/or related to the Fund.

What are the costs?

Costs over Time The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does (where applicable). The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

Investment: Euro10,000	If you cash-in after 1 year	If you cash-in after 3 year	If you cash-in after 5 year
Total Costs	Euro 700	Euro 500	Euro 300
Annual Cost Impact (*)	7%	5%	3%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be []% before costs and []% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount. Please note that the figures shown here do not include any additional fees that may be charged by your distributor, advisor or any insurance wrapper in which the fund may be placed.

Composition of Costs
The table below shows the meaning of the different cost categories.

Ongoing costs	Management fees	2% of the value of your investment per year.	200 EUR
Ongoing costs taken each year Incidental costs taken under specific conditions	Transaction costs	0.1% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	10 EUR
	Performance Fees	20% The actual amount will vary depending on how well your investment performs.	

How long should I hold it and can I take my money out early?

There is no recommended holding period or minimum holding period. However, the investors will be able to redeem their investment in accordance with the section "Redemptions" of the dedicated section of the prospectus.

How can I complain?

Investors in the Fund shall address any complaints by registered mail to the AIFM.

The AIFM has to confirm receipt within ten (10) days and confirming the anticipated time for investigating and providing a full response.
